

EROSION & SEDIMENT CONTROL FIELD SEMINAR SARTELL, MINNESOTA

An Opportunity to Learn About the Latest Practices & Products

Date: Tuesday August 1, 2017
Location: **Field Seminar:** Sartell New High School Building Site
Lunch & Learn: Sartell Oak Ridge Elementary School
1111 27th Street North, Sartell MN
Time: Select a morning or afternoon field seminar with an option for a noon lunch & learn!

9:00am to 11:00am OR 1:30am to 3:30pm
Field Seminar at the New Sartell High School Building Site

What you will learn:

Perimeter control options – there’s a lot more than silt fence. Rolled Erosion Control Products (blankets); what’s the proper overlap, staple pattern, trenching, etc. When to use the different types of products. Concrete washout options for small construction sites. What to use to contain the rinse water when tools are cleaned. Sediment removal products for turbidity reduction. Permeable pavers. Underground water storage system products. Construction entrance options. Inlet Protection..... And much more!

11:30am to 1:00pm ~ Lunch and Learn (Must be registered for one of the field seminars to attend.)

Discussion of the New High School Site for St. Cloud Tech

As a bonus to the field seminars, MECA is offering a lunch and learn to plan Best Management Practices and Conservation Design Concepts for the St. Cloud Tech High School property. *(You must register for one of the field seminars to register for this lunch.)*

The new St. Cloud Tech High School site is bounded on two sides by a designated trout stream, has 20’ of relief within the site, a natural spring that feeds the stream, and a wetland buffer. The site features create an opportunity for a serene high school campus setting with environmental learning opportunities. Developing this site while protecting the resources that make it special will require a variety of temporary and permanent erosion control/stormwater techniques. Sign up for the morning or afternoon MECA field seminar and join us for lunch that will include the following discussions: Design Concepts, Natural Resource Protection, Outdoor Environmental Learning Opportunities, Best Management Practices Scenarios & Vendor Product Applications

The Lunch and Learn discussions will be led by Dan Folsom P.E. (Design Tree Engineering), Wayne Cymbaluk (Stearns County SWCD), Noah Czech (City of St. Cloud) and various erosion control and stormwater product vendors.

WHO SHOULD ATTEND

City ~ County ~ Watershed ~ SWCD Staff ~ Building Contractors - Excavators ~ Demolition Contractors ~ Inspectors
Consultants - Whoever deals with construction erosion, sediment control & runoff reduction concerns.

This event is sponsored by MECA and the Stearns County Soil and Water Conservation District
